2010 LAKE TREATMENT NOTICE – PLEASE READ - IMPORTANT

The residents of your lake are planning to have the lake treated with aquatic herbicides to control lake weeds, and algae.

This notice is being circulated at least (7) days in advance of the initial treatment in accordance with Michigan Department of Environmental Quality (MDEQ) requirements. This notice will only be sent **once** this season, however we will perform **several** applications. Each time that we treat your water body – we will post new brightly colored 11" x 17" signs. You are receiving this notice if you are in the proposed treatment area, or if you are within 100 feet of the treatment area. As a courtesy, this notice may also be sent to adjoining subdivisions, and property owners that have deeded access to the lake. **Please keep this notice, as you will NOT receive additional notices for each treatment.** A permit for this treatment will be secured from the MDEQ before any work is performed. The timing for each lake treatment is dependent on conditions like weather, water level, and water temperature. For this reason, we cannot predict treatment schedules. Our initial treatments usually occur last week of May, first (2) weeks in June. Please watch for the posting of your lake. We will be treating more than once this season. Posted signs will indicate the aquatic herbicides utilized, and the associated water restrictions. All aquatic herbicides & algaecides are approved by the State of Michigan and the Federal EPA, and are applied in amounts approved by the MDEQ. When these products are applied at the approved application rate, the aquatic herbicides & algaecides are not harmful to fish or wildlife. We anticipate using one or more of the products listed below. Please be aware of the associated water use restrictions on each. **PLEASE READ THE SIGNS POSTED AND DO NOT REMOVE THEM UNTIL ALL RESTRICTIONS HAVE EXPIRED. THANK YOU.**

AQUATIC HERBICIDES & ALGAECIDES, AND THEIR ASSOCIATED WATER-USE RESTRICTIONS ARE AS FOLLOWS:

Navigate (2-4D): Do not use the treated water for swimming for 1 day. Do not use the treated water for irrigation, agricultural sprays, watering dairy animals, or domestic water supplies for (14) days. "Irrigation" includes watering gardens, but does not include watering lawns. Watering lawns when only 2,4-D has been applied will not hurt your lawn. "Domestic use" means using lake water inside your dwelling. Fish and wildlife are not affected at the applied application rates. There is NO restriction on fish consumption.

Reward, Redwing (Diquat dibromide): Do not use the treated water for swimming or livestock consumption for 1 day. Do not use water for drinking or irrigation for 5 days. There is NO restriction on fish consumption.

Aquathol K, Hydrothol 191 (Endothall Products): Do not use the treated water for swimming for 1 day. Do not use the water for household use, irrigation (lawns or gardens), animal watering (farm stock), or similar uses for 14 days.

Copper Based Products (Copper Sulfate & Chelated Coppers): Triangle Brand-Crystal, Chem One Ltd. Copper Sulfate Pentahydrate, Old Bridge Inc., Algimycin-PWF, Cutrine-Plus, Cutrine-Ultra, Cutrine-Plus Granular, Symmetry, Captain: No water-use restrictions with the use of any of these products.

Komeen, Nautique & Current: Do not use the treated water for swimming for 1 day. There are NO restrictions on watering (irrigation) or fish consumption.

Renovate 3, Renovate OTF, Navitrol DPF (Triclopyr): Do not use the treated water for swimming for 1 day. Do not use water for irrigation of any plants (except for established lawns/grasses) for 120 days. There are NO irrigation restrictions on established lawns / grasses or fish consumption.

Habitat, AquaPier (Imazapyr): Do not use the treated areas for swimming for 1 day. Do not use water for irrigation for 120 days. There is NO restriction on fish consumption. These products are used primarily for aquatic emergent control (Lily Pads, Cattails, Phragmites etc.).

Clearcast (Imazamox): Do not use the treated areas for swimming for 1 day. Do not use water for irrigation for 1 day. There is NO restriction on fish consumption. These products are used primarily for aquatic emergent control (Lily Pads, Cattails, Phragmites etc.).

Glyphosate Products: Aqua Pro, Aqua Star, AquaNeat: These products are used primarily for aquatic emergent control (Lily Pads, Cattails, Phragmites etc.). Do not use the treated areas for swimming for 1 day. There are NO restrictions on watering (irrigation) or fish consumption.

Cygnat Plus, Agridex, Poly An (Additives): May be used in conjunction with other liquid herbicides and/or algaecide products and DO NOT have any additional water-use restrictions associated with their combined uses.

If you have any questions, please contact your primary lake management contact person. If they cannot answer your questions we can be reached at the phone numbers above. Thank You - Savin Lake Services Inc.
